

GOOD GAS NEWS

April 2017

April is National Safe Digging Month. Call 811 before you dig

Are home improvement projects in your future? If so, remember to call 811 before you dig.

Calling 811 before you begin your project isn't just a good idea, it's the law. The free service helps to reduce the risk of striking and damaging an underground utility line.

Calls to 811 can be made 24 hours a day. After you call, local utilities will mark the approximate location of their utility infrastructure at your site, identifying areas to avoid.

State law requires you call 811 at least three (3) business days before you plan to dig.

**Know what's below.
Call before you dig.**

One less worry can lead to...

a side of giggles with dinner.

CRP from PGW cuts gas bills for close to 50,000 customers. And our easy application is something else to smile about.*

Questions? Call 215-235-1000 or visit pgworks.com

*CRP is open to qualifying residential customers whose gross household income is no more than 150% of the Federal Poverty Level. Other criteria may also apply.

Natural gas: The best choice for cost savings, reliability, and comfort.

Clean, reliable natural gas is the best choice when it comes to cooking, drying clothes, and heating your home and water. Here's why.

Natural gas is:

Clean

- Choosing natural gas is an easy way to reduce your impact on the environment without sacrificing comfort.

Cost Effective

- Natural gas appliances often cost less money to operate than electric appliances.
- Electricity can lose more than 80 percent of its energy potential in its journey to your electric outlet. Natural gas only loses about 10 percent of its usable energy going from wellhead to burner tip.*

Reliable

- Natural gas is an abundant, domestically produced fuel you can count on.
- Since the natural gas system is underground, outages are rare.

Natural Gas Creates Jobs

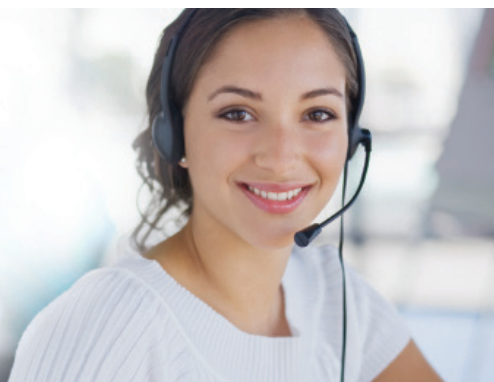

- Unlike other energy sources, most of the natural gas consumed locally is produced right here in America.
- Using natural gas creates local jobs and reduces dependence on foreign oil.

*American Public Gas Association

Do you use natural gas for home heating and want to save on high water heating bills for your current electric, oil, or propane service? Call a PGW specialist at 215-684-6750 today.
