

THINK YOU SMELL GAS? CALL PGW AT 215-235-1212

Natural gas has an unpleasant, rotten egg-like odor for easy detection and your safety. If you think you smell gas, leave the area immediately, then call PGW at **215-235-1212**.

Remember, if you think you smell gas:

NEVER Use electrical devices.

NEVER Use an open flame, matches or lighter.

NEVER Try to locate the source of the gas leak.

NEVER Try to shut off any natural gas valves or appliances.

NEVER Re-enter the building or return to the area until a qualified utility representative says it is safe to do so.

CARBON MONOXIDE: NO SCENT, SOUND OR COLOR

Carbon Monoxide (CO) is a colorless, odorless gas that can cause illness or death. Prevent CO poisoning by installing a CO detector and checking and replacing its batteries regularly. Learn more about protecting yourself and loved ones from CO poisoning and the symptoms of CO poisoning at cdc.gov

About natural gas

Customers like you who choose natural gas appliances over their propane, oil or electric counterparts, can save an average of \$300 to \$2,262 annually, according to the American Gas Association. And there are more benefits:

CLEAN

- Natural gas is the cleanest fossil fuel available.
- Natural Gas is today's readily available environmental energy choice. It can help address several environmental concerns, including smog, acid rain and greenhouse gas emissions.

EFFICIENT

- Our nation's distribution system is comprised of more than 2.2 million miles of underground pipes.
- PGW is responsible for managing 6,000 miles of that system, allowing for gas to be delivered directly to you.

RELIABLE

- Regardless of the weather, customers can depend on the delivery of natural gas.
- PGW adds another layer of reliability to its service by holding a portion of natural gas on reserve for extreme cold weather.
