## PHILLY SAVES MORE USING NATURAL GAS

A CLEANER, CHEAPER ENERGY SOURCE.

You know that with the push of a button or turn of a knob, the blue flame of natural gas helps you enjoy life's comforts. But, did you also know that by choosing natural gas appliances over their propane, oil or electric counterparts, you're saving yourself money? According to the American Gas Association, operating a natural gas furnace, water heater, or both can save families \$300 to \$2,262 per year.

### 2014 Estimated Annual Residential Heating Cost Summary

The estimated heating costs above are not for high efficiency (97% AFUE) equipment. You could save even more with high efficiency natural gas equipment. Visit [pgwenergysense.com](http://pgwenergysense.com) for more information, including available grants, incentives and tips from PGW.
