IMPORTANT CO SAFETY INFO

Carbon monoxide (CO) can be produced by home appliances and other fuel-burning equipment. CO is a colorless, odorless, and potentially dangerous gas that can cause sickness – even death.

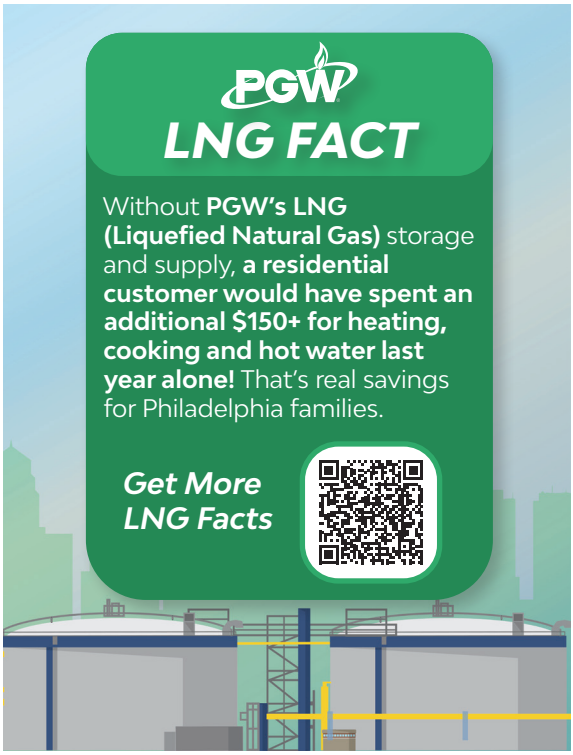

To protect your family:

- ▶ Have all your fuel-burning appliances serviced regularly by a qualified technician.
- ▶ Have a CO detector alarm installed, if you don't already have one.
- ▶ Check your alarm's batteries every six months (Daylight Saving Time is a good reminder).
- ▶ Never use an oven to heat your home.

If you suspect CO poisoning,

CALL 911.
