GOOD GAS NEWS

PGW

Don't Wait be Prepared

Taking time to prepare can help keep your family safe when disasters or other emergencies strike, especially during a pandemic. It will also help ease stress and worries as you recover.

September is National Preparedness Month and this year's national theme is: **Disasters Don't Wait. Make Your Plan Today.**

Put **#SafetyFirst**. One of the best things you can do is create an emergency kit and use or replace by posted expiration dates. Here are some things to include:

- Water (gallon per day/person) for 3 days
- Flashlight
- First aid kit
- Food (non-perishable) for 3 days and can opener
- Battery powered radio
- Extra batteries
- Cell phone chargers/backup batteries
- Cash
- Prescription medication

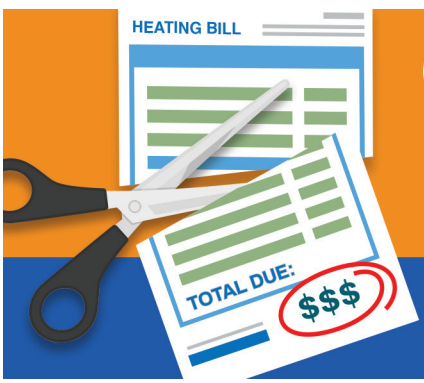

Double check to make sure you also have items to keep your family protected during the pandemic.

- Cloth face coverings
- Disinfecting spray/wipes
- Hand sanitizer

Consider creating separate kits for work, home and your vehicle because you never know when an emergency will occur.

Remember to store important documents – insurance, financial, health and legal papers – in a fireproof and waterproof box or safe.

SAFETY CHECKS

PGW technicians perform home safety checks

As part of our commitment to provide safe, reliable natural gas service, PGW is conducting in-home meter and service line safety inspections.

These inspections are required by law every three years to assess the condition of the gas meter as well as service line piping, and are quickly completed.

If you receive a Meter Inspection request from PGW, please contact us at 215-235-1000, M-F between 8 a.m. and 6 p.m. to schedule your appointment. Our representatives will explain the process and answer any questions you may have.

Safety checks will be scheduled with customers and PGW technicians will:

- Have a PGW badge,
- Arrive in official vehicles, and
- Wear PGW-branded clothing.

Our technicians are following health guidelines and taking extra precautions like:

- Wearing masks and gloves.
- Keeping social distance.

If you are ever unsure if a person is a utility worker, call 911 to verify before you open the door.

ENERGY FOR ALL OF US

PGW remains committed to helping Philadelphia reach its environmental goals. Here is what that looks like at PGW:

$8.9 million

Awarded for conservation grants and rebates to Philadelphia homes and businesses.

9,200 metric tons

Methane emissions reduced through pipeline upgrades.*

2,723 tons

Carbon footprint savings at PGW facilities since 2010.

CO_2
