Stay Protected From Imposters & Scammers

Always ask for identification before letting anyone claiming to be a utility worker into your home or business.

All PGW employees have:

- ID badges.
- Official white PGW vehicles with PGW logos and municipal license plates.
- Branded clothing.

If you're the slightest bit unsure, CALL 911. Police have a direct line to PGW and can verify someone's claim.

Protect your personal information.

Scammers may call, text, or email utility customers threatening disconnection without immediate payment.

PGW WILL NOT ask for your personal information, such as your:

- Account number,
- Social Security number, or
- Other sensitive information.

If you feel unsure, Call PGW at 215-235-1000.

DO NOT USE THE NUMBER THEY GIVE YOU OR THE NUMBER ON YOUR CALLER ID!

PGW LOWERS METHANE EMISSIONS

PGW exceeded a corporate goal by lowering its carbon footprint by **12,412 metric tons (MT) of carbon dioxide equivalent (CO₂e)**, which is detailed in the **2026 Greenhouse Gas Emissions Reduction Report**.

Report Highlights

Replaced **36.1 miles** of cast iron and unprotected steel services, reducing emissions by approximately **7,267 MT** of CO₂e.

Reduced **3,000 MT** of CO₂e through EnergySense programs. Go to pgwenergysense.com to learn more about EnergySense rebates and incentives.

Redirected tons of waste through a company recycling program to prevent **1,272 MT** of CO₂e.

Visit pgworks.com/sustainability to read the complete report and learn about PGW's Sustainability initiatives.

Pipeline Map Gives You The 411 On Projects In Your Area

Warmer weather brings increased activity with Pipeline Improvement Projects. This work improves reliability and eliminates methane emissions.

Stay up to date about work in your neighborhood, near your job, and along your commute with our Pipeline Improvement Map.

The map lets you:

- Identify active and upcoming projects.
- See schedule for completion.
- Check the status of projects.

PGW Introduces Low Carbon Pathways Study

PGW's Low Carbon Pathways study will:

- **Identify and assess a range of leading decarbonization opportunities** including end-use energy efficiency, electrification, lower carbon fuels, carbon capture and storage, and thermal energy networks, among others.
- **Develop and analyze long-term emission reduction pathways** to reduce Greenhouse Gas (GHG) emissions in the City of Philadelphia based on:
 - ❖ Emissions abatement impacts;
 - ❖ Total system costs and cost-effectiveness; and
 - ❖ PGW customer impacts including rates and adoption potentials.

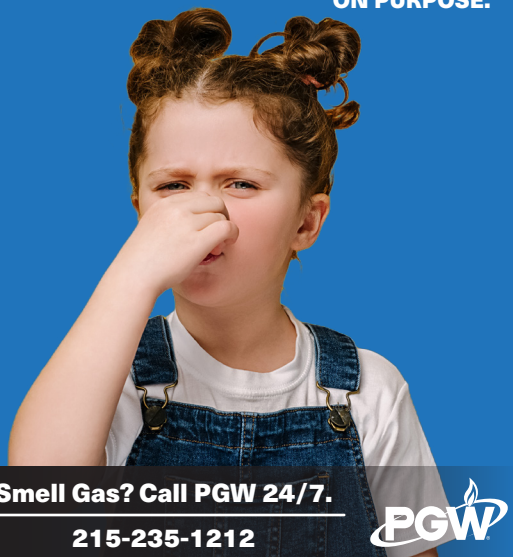

The goal of this study is not to identify a preferred pathway, but rather to **explore a range of viable options** as representative examples for comparison, and **to establish a foundation for future decision making.**
