

# GOOD GAS NEWS

June 2017

## PGW GOES GREEN WITH PHILLIES, PHS

Our commitment to Philadelphia is strong and unwavering. After all, our employees don't just work in this City, it's where we call home.

That's why PGW has partnered with the Phillies and the Pennsylvania Horticultural Society (PHS) in support of their Home Runs for Trees initiative, for the second year in a row. For every home run hit by a Phillies player, a tree is planted in parks, urban neighborhoods or watershed areas.

PGW joined the Phillies, PHS, and senior residents of Congresso in North Philadelphia in April to plant the first tree of the season. The Phanatic brought his salsa moves,

we brought our renewed commitment to the health and sustainability of Philadelphia.

Now in its sixth year, Home Runs for Trees is part of Plant One Million, the nation's largest multi-state tree campaign working to restore the area of land shaded by trees in the Greater Philadelphia region by 30%.

To date, 537,000 trees have been planted, bringing us closer to 1 million trees. Follow us on Facebook to check out photos from the first tree planting of the season and track how many trees have been planted in 2017.

## PLANNING A MOVE?

Before you move, remember to contact PGW at least seven days in advance to turn off or transfer your gas service. A service turn on, off, or transfer can be completed at [www.pgworks.com](http://www.pgworks.com) or by calling us at 215-235-1000.

Our Customer Care Team is available to assist you Monday through Friday, 8 a.m. to 6 p.m.

PGW will conduct a final meter reading and transfer your account once your move date is confirmed.

# PGW WARNS PUBLIC OF NEW EMPLOYMENT SCAM

*Unemployed? Looking for work? Don't fall for scammers' new ploy, targeting Philadelphians.*

The fliers keep appearing. On public transportation, at train and bus stations and in other high-traffic areas, scammers are posting fliers that promote “full time PGW consultant” positions at PGW. There are no such positions.

The job offers may seem enticing to people looking for work, but they are fake. All current job opportunities with PGW are available at [pgworks.com/careers](http://pgworks.com/careers).

At PGW, we take pride in working for Philadelphia, and in welcoming new members to our award-winning team. Before responding to a flyer or job ad, here are a few things you should know:

- You will NEVER be asked to apply for a PGW job by phone.
- ALL available jobs are posted to our official website, [pgworks.com/careers](http://pgworks.com/careers)
- If you see a PGW job posted anywhere other than our website, verify it at [pgworks.com/careers](http://pgworks.com/careers) before applying.

PGW considers applicants for all positions without regard to race, color, religion, sex, national origin, age, marital or veteran status, the presence of non-job-related medical condition or disability, or any other legally protected status.

## SUMMER'S AROUND THE CORNER!

Here are a few energy saving tips to keep you from getting hot under the collar.

Stay cool in summer and still save energy. Check out these simple, low-cost steps you can take for maximum savings.

- Use appliances in early morning or evening, when temperatures are lower.
- Turn off fans when you leave a room. Fans help keep you cool, but most don't lower temperatures.
- Use natural ventilation. If you can do so safely, open your windows while sleeping. When you wake in the morning, shut the windows and blinds to contain the cool air.
- Lower your water heater's thermostat. According to the U.S. Department of Energy, lowering it by 10 degrees can save up to 5 percent in energy costs.

## PGW: WE WORK FOR PHILADELPHIA

Philadelphia needs safe, clean, reliable energy to continue growing and improving. PGW is here to help.

We manage 6,000 miles of natural gas infrastructure so that the comfort and convenience of natural gas is available in every neighborhood. In communities all across our city, we're investing millions of dollars a year, maintaining and upgrading our systems. We're committed to making sure that – no matter the weather and no matter the demand – your natural gas is there when you need it.

With many generations of local experience and expertise, our well-trained crews take on projects big and small to meet the complex energy needs of a vibrant Philadelphia. We constantly inspect, maintain, and monitor our pipeline network, minimizing service disruptions and maximizing safety and reliability. While these maintenance, repair and upgrade projects are essential, they can also raise a lot of questions.

You can visit [pgworks.com](http://pgworks.com) to find answers to common questions.
