

GOOD GAS NEWS

PGW, EAGLES GO GREEN WITH FIELD GOAL FOREST PROGRAM

PGW volunteers recently planted 400 new trees in the Eagles Forest at Neshaminy State Park as part of the Field Goal Forest program with the Philadelphia Eagles.

Nearly 60 employees rolled up their sleeves to help our environment, and give back to the community. We work for Philadelphia and part of that work means preserving the environment we all share. This program is one way we're able to do that.

Before the season began, PGW pledged to plant 10 trees for every Eagles field goal made. The Eagles ended up with 40 field goals, totaling 400 trees!

The Field Goal Forest program is part of the Eagles' "Go Green" initiative, which began in 2003.

We look forward to another winning season, more field goals and more trees!

CALL 811 BEFORE YOU DIG

Ready to dig? Do it safely! No matter if you're planning a DIY project or hiring a professional - smart digging means first dialing 811. This free service marks underground utility lines so you know where to avoid. That keeps you and your property safe. Remember, **it's the law.**

PROVIDING PROFESSIONAL DEVELOPMENT TO KENSINGTON HIGH SCHOOL STUDENTS

Exposing young people to new experiences can inspire a passion they never knew existed. Kensington High students recently completed their second year working with PGW employees through the Adopt-A-School program in partnership with the School District of Philadelphia and the Urban League of Philadelphia.

PGW is one of 10 leading, local businesses selected to inspire students to graduate from high school then enroll in college or a job training program. The sophomore students also received leadership and career development training.

This year's workshops and activities focused

on professional development. Company employees, representing different career fields, spent time with students discussing how to decide on a career, how to write a resume and the dos and don'ts of interviewing.

We concluded this year's program by welcoming the students to PGW headquarters to learn about more career opportunities and interact with employees.

We are confident that these hard-working students will be successful in their future endeavors. We can't wait to see what positive paths they take!

HELPING THE ENVIRONMENT ONE HOMER AT A TIME

We have joined with the Philadelphia Phillies and the Pennsylvania Horticultural Society for Home Runs for Trees.

Every time a Phillies player hits a home run, PGW and our partners pledge to plant a tree in a local park, urban setting or watershed area. Nearly 900 trees have been planted since the program began in 2010.

Keep up with the tree count throughout the season by following us on Twitter (@MyPGW) and friending us on Facebook (@MyPGW). Check using #HR4Trees. Keep hitting those homers!
