

GOOD GAS NEWS

May 2015

Keeping you better informed about work in your neighborhood

*Connect with us on **Nextdoor.com** starting this May.*

In every season, PGW is focused on the safe, reliable delivery of natural gas. We constantly inspect, maintain and monitor our more than 6,000 miles of gas mains and service lines to meet the complex energy needs of our City – investing millions of dollars a year to:

- Maintain Philadelphia's natural gas distribution system,
- Sustain local businesses,
- Deliver the energy our City needs, and
- Minimize service disruptions.

Maintenance occurs year-round, but warmer weather allows our well-trained, experienced crews to work on new projects, and install even more service lines so more Philadelphians can enjoy the benefits of natural gas.

We recognize that more installations can mean more disruption – and we understand it can be an inconvenience. We appreciate your patience and support as we commit to letting you know when and where we'll be working.

Connect with your neighbors and PGW on Nextdoor

PGW is now on Nextdoor, the free and private social network for Philadelphia neighborhoods. Join today and stay in the know about improvement efforts, safety tips, and PGW updates.

Energy tips to help keep cool

We're always looking for ways to be more efficient and sharing those tips with our neighbors. Here are a few. We invite you to learn more at pgwenergysense.com.

- **Use appliances in early morning or evening**, when temperatures are lower.
- **Turn off fans when you leave a room.** Fans help keep you cool, but most don't lower temperatures.
- **Lower your water heater's thermostat.** According to the US Department of Energy, lowering it by 10 degrees can save up to 5 percent in energy costs.

For more helpful tips, visit pgwenergysense.com

As warmer temperatures arrive - **KEEP IT LIT**

Avoid the need for expensive repairs by keeping your heater pilot on year-round. Keeping the pilot lit – even on hot summer days – will keep your heater parts dry, rust-free and ready for when cold weather returns.

The cost of keeping your pilot lit is minimal and will save you the hassle of having to re-light it each winter.

Some customers cut their PGW bill by 50% or more, with CRP.

If you're a low-income residential customer, you owe it to yourself to check out CRP.

CRP by Philadelphia Gas Works may be the fastest way to get a smaller monthly bill. Find out if you qualify at PGWorks.com or visit a PGW customer service center.
