

GOOD GAS NEWS

November 2017

SIMPLE. QUICK. WORTH IT.

APPLY TODAY FOR A LIHEAP GRANT. TEXT FAST TO 75308

No one should have to choose between staying warm and affording other basic needs, like food and medications. A Low Income Home Energy Assistance Program (LIHEAP) grant can ease the load.

Apply today for a no-strings LIHEAP grant of up to \$1,000. Over 60,000 PGW customers received grants last year, and even more were eligible.

You owe it to yourself to apply.

Text FAST to 75308, visit pgworks.com/LIHEAP, or stop into a PGW customer service center (we have six throughout the City).

Know someone who could use help this winter? Let them know about LIHEAP. More information is available on pgworks.com/LIHEAP.

Message and data rates may apply.

PGW TEAMS WITH EAGLES TO PLANT FIELD GOAL FOREST

Sustainability is a cornerstone of PGW, and the Philadelphia Eagles. We're teaming up to encourage our community to preserve the environment we all share through the Eagles' Field Goal Forest program.

For every field goal the Eagles make this season, PGW will plant 10 trees in the Eagles Forest. The program is part of the Eagles' "Go Green" initiative.

Join us as we cheer on our home team, while helping preserve our environment.

Follow us @MyPGW, and like us on Facebook.com/MyPGW to get updates on the number of trees planted this season.

FALL NATURAL GAS SAFETY: HAVE YOUR FUEL BURNING APPLIANCES CHECKED ANNUALLY

For your safety it is important to have major natural gas, electric or other fuel-burning appliances and equipment – such as furnaces, boilers, ranges, water heaters and clothes dryers – periodically inspected. Failure to have this equipment properly maintained could lead to property damage, personal injury or even death.

Have a trained professional heating contractor perform a safety inspection on all fuel-burning appliances each year.

The contractor should check to make sure:

- All appliances are installed and operating properly.
- All burners receive enough outside/fresh air for complete combustion.
- All vents, chimneys and flues are clear and well connected.

Additional Safety Tips

- Never use an oven or range as a space heater.
- Never let the car run in an attached garage.
- Never sleep in a room with an unvented gas or kerosene space heater.
- Never operate gasoline-powered engines (generators, chain saws, etc.) in enclosed spaces.
- Never use a barbecue or charcoal grill indoors.

PGW IN THE COMMUNITY INVITE US TO YOUR NEXT EVENT.

If you would like PGW to attend your next community event to speak or provide information on energy efficiency, grant programs, and/or customer assistance programs, contact our **Public Affairs Team** at feedback@pgworks.com.

- Learn how to cut down the costs of natural gas bills;
- Find where to apply for grant money to help pay heating bills; and
- Have questions answered in person.

PGW HOSTS EVENT TO HELP GROW MINORITY BUSINESSES IN PHILADELPHIA

PGW is committed to encouraging the growth of companies with certification as Minority, Women, Disabled, and Veteran-owned businesses. That's why we served as event hosts during the City of Philadelphia's 33rd annual Minority Enterprise Development Week.

Dozens of businesses spanning various fields, such as engineering, food service, graphic design, computer services and more attended "Bringing Awareness to the City, How to do Business with PGW" at our Corporate Headquarters in early October.

Vendors learned about the many opportunities to

provide goods and services to the nation's largest municipally owned natural gas company.

Along with detailing the process for how PGW selects its vendors, companies were invited to participate in a matchmaking session to meet with PGW representatives about potential opportunities. Guests also shared information about their company's products and services.

Interested in doing business with PGW?

Visit pgworks.com for a list of current business opportunities.
